IKO WATER BASED ADHESIVE

IKO Water Based Adhesive is a water-base modified asphalt emulsion primer that provides an excellent primer for installation of self-adhesive membrane and torch-grade membranes. It is formulated with performance-enhancing polymer and asphalt, making it an excellent alternative for traditional solvent-base primers. IKO Water Based Adhesive can be applied with a brush, roller or airless sprayer for solvent-based products. Use a short nap if using a roller. It must be allowed to dry thoroughly before application of self-adhesive membrane or torch-grade membrane. IKO Water Based Adhesive can be cleaned up with water (while wet) or mineral spirits (dried material). IKO's roofing products are produced and designed with consideration for environmental responsibility and sustainability, incorporating quality recycled components whenever possible, manufactured in facilities that comply with the most stringent government environmental regulations, and can therefore be a part of any "green" construction project.

CHARACTERISTIC	UNITS	NOMINAL VALUE
COLOUR:	-	Brown-black liquid
SOLIDS BY WEIGHT: +/- 3%	%	44 - 50
DENSITY:	gm/ml	1.01
VISCOSITY:	cps	400-700
COVERAGE (APPROXIMATE):	m ² /L	4.37 – 5.25
DRYING TIME (25°C, 60% RH)*:	min.	30 - 60
APPLICATION TEMPERATURE:	°C	>5
SHELF LIFE:	months	6 (unopened)

*CAUTION: Cold temperature and high humidity will prolong dry times.

NOTE:

Storage requirement: this product **must be kept from freezing**. If the product freezes, it is not useable and will have to be discarded as it is **not freeze/ thaw stable**.
